

Lab Exam – HTML

Exam Name: HTML

Total Time: 60 Minutes

Student Id: E251208

Total Marks: 10

Section: 2AF

Date: 02/11/2025

Task: Design an HTML web page by following these steps:

1. Use semantic HTML tags (like <header>, <nav>, <main>, <section>, <footer>, etc.).
2. Separate each section using a background color or a solid border.
3. The navigation bar (nav bar) must be sticky (it should stay at the top when scrolling).
 - On the right side of the nav bar, show your student ID.
4. In the footer, also write your student ID at the end.
5. After finishing your code, create a PDF file that includes:
 - Your HTML code snippets
 - The output screenshots of your webpage
6. You have to print the PDF file and submit it to the department. So, you must save a copy of the PDF file for yourself.
7. You will get 60 minutes total:
 - 50 minutes for coding
 - 10 minutes to make the PDF file.
8. The editable doc file is available from the link provided bellow:
https://github.com/asl-rnd/web_programming/blob/main/lab_exam_sample.docx

Global Warming

Global Warming is *along term* rise in Esrth's average surface temperature largely driven by human activities like burning fossil fuels. Scientist point to rising levels of CO₂ and other greenhouse gases(for example, CH₄ and N₂O) as the primary cause. The result is changing weather patterns, melting ice, and sea-level rise--a trend that **already affects millions**

Causes, Effects and Solution of Global Warming

Global Warming Overview		
Causes	Buring Fossil Fuels	CO ₂ Emissions
	Deforestation	Methane from Agriculture
Effect	Rising Sea Levels	Climate Change & Extreme Weather
	Meltaing Glaciers & Ice Caps	
Possible Solution		Renewable Energy, Recycling, Awareness
